EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kent Seiffert on March 28, 2005.

The application has been amended as follows:

Claim 1, line 9: please delete "API" and insert "first access interface".

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose providing for, nor suggests providing for, a plurality of access interfaces integrated into the operating system of the computer. These access interfaces are not external to the operating system, such as application programs utilizing APIs in order to access remote storage devices, thereby providing a seamless network-based remote storage environment which is novel.

The closest prior art of record is Davis et al. (USPN 5,937,160) (cited by Applicant in IDS) (hereinafter Davis). Davis discloses a method of automatically revising a hypertext document via an email message. Although it is disclosed as a method of an access interface, it does not disclose multiple interoperable access

Art Unit: 2143

interfaces for accessing a remote storage areas as claimed by the Applicant. Davis is only concerned with the ability to update a web page using electronic mail (as shown in Figure 6).

For the above reasons, and further in conjunction with the other limitations of the independent claims as well as the terminal disclaimer filed which limits the patentability in accordance with the parent case, patent no. 6,735,623, render the case in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Terminal Disclaimer

3. The terminal disclaimer filed on April 28, 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of patent 6,735,623 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Information Disclosure Statement

4. The Information Disclosure Statement filed March 9, 2004 has been considered. See enclosed PTO-1449.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
6. Buyukkoc et al. (USPN 6,189,043) discloses dynamic cache replication in an Internet environment through routers and server utilizing a reverse tree generation.
7. Elgamal (USPN 5,671,279) discloses electronic commerce using a secure courier system.
8. Banga et al. (USPN 6,240,447) discloses reducing perceived delay between a time data is requested and a time data is available for display.
9. McAllister et al. (USPN 6,442,242) discloses multifunction autoattendant system.
10. McCanne (US 2003/0088696) discloses performing multicast communication in computer networks by using overlay routing.
11. Ganesan (USPN 5,748,735) disclose securing email communications and encrypted file storage using cryptography.
12. Morris (USPN 5,634,052) discloses reducing storage requirements and transmission loads in a backup subsystem in client-server environment by transmitting only delta files from client to server.
13. Kuzma (USPN 5,781,901) discloses transmitting email attachment over a network using an email page.
14. Blakely, Jose (Universal Data Access with OLE DB, IEEE © 1997) discloses an OLE DB API to enable access to all kinds of data sources both database and non-database.

Art Unit: 2143

15. Potel et al. ("Comet Explodes on Jupiter-and the Web" IEEE Computer Graphics and Applications November 1994) discloses problems and general slowdown of the Internet and its functions.
